

A smiling woman in a white lab coat is the central focus of the upper half of the image. She is looking towards the camera. In the background, other people in lab coats are blurred. In the foreground, a green generator unit with a white engine and a black control panel is visible.

# patruus

Traditional solution.

## Traditional solution.

The patruus, with engine technology that has been established for decades, is the most experienced member of the 2G power plant family. It is a sturdy and efficient supplier of power and heat and is electrically available in the output range up to 64 kW.

- Designed as a connection-ready compact module
- High plant availability due to established engine technology
- Available with both naturally-aspirated or turbocharged engines
- Modular design facilitates installation in hard to reach places
- Sturdy and low-maintenance

## patruus. 50 to 64 kW.

Type	Configuration	Electrical output Biogas	Thermal output Biogas
<b>patruus 50</b>	ct80-0	50 kW	70 kW
<b>patruus 64</b>	ct80-0	64 kW	85 kW

Efficiency levels, see p. 28-31.
